

## *Web Developer*

### EDUCATION

---

Heriot-Watt University, Edinburgh, Oct. 2005 - Sept. 2006

*MSc in Distributed & Multimedia Information Systems including: Advanced Database Systems, Mobile Networking, Distributed Systems Programming, Information Systems Methodologies, Software Engineering, Multimedia Design, Network Applications.*

Napier University, Edinburgh, Sept. 2003 - June 2005

*BSc (Hons) in Computing 2.2*

Institut Universitaire de Technologie, Nice, France, Sept. 2002 - June 2003

*LPMI (Professional Licence of Computing Works)*

Institut Universitaire de Technologie, Nice, France, Sept. 1999 - June 2002

*DUT in Computer Science (Technological University's Diploma)*

Lycée Jules Ferry, Cannes, France, Sept. 1997 - June 1999

*French Baccalaureate in STI Electronic (Industrial Technology Science)*

### SKILLS

---

#### Technical Capacities

- *Web Development*: Mastering of PHP5, HTML5, CSS3 and Javascript (including AJAX), XML, JSON.
- *Frameworks/ORM/CMS*: Good knowledge of Symfony, Zend, Doctrine, CakePHP, Joomla!, Wordpress, osCommerce.
- *Databases*: Excellent knowledge of SQL and relational databases, MySQL, PostgreSQL and Access.
- *Development tools*: Familiar with Eclipse, SVN, Mercurial, Track, Redmine, Ubuntu, Mandriva.
- *Software Development*: Competent in JAVA and Visual Basic (also Access VBA), good knowledge of C++ and VB.NET.
- *Multimedia*: GIMP, Photoshop, Flash MX.

#### Communication

- During my work experience; I have often been asked to present material to an audience and to write consistent documentations and reports.
- While working for Wyplay, the *Agile methodology* was part of the common practices of our team. This has trained me to accurately estimate the task for projects I was involved in.
- I have often been asked to stick to deadlines. After numerous different projects done though my work experience, I am able to plan and organise projects as well as conform to a given plan with exactitude.

#### Problem Solving

- Since I have been working for relatively small company in the past, I had to endorse different responsibilities and to take important decisions regarding the orientations of the growth of these companies.
- I have already been confronted by a lot of strange and curious problems during my past experiences. Hence, I am now able to reason quickly and find a range of solutions that may solve a given problem.

#### Languages

- Native speaker of French
- Excellent level of English

## WORK EXPERIENCE

---

Wyplay, Allauch, France

February 2011 – November 2012

- Development of a web TV App Store for the client Belgacom in *PHP5*, *HTML5*, *CSS3* and *Doctrine*.
- Creation of *javascript* libraries used by TV application developers.
- Enhanced an application catalog manager software based on *Symfony*.

B-pack Services, Aix-en-Provence, France

September 2010 – February 2011

- Developed, adapt and customise the B-Pack buying software in *PHP* for different clients.

Tribalogic Ltd, Edinburgh, Scotland

September 2007 – August 2010

- Enhanced and created *Online Booking Systems* for self catering accommodation, caravan parks and event tickets using *PHP5* and *AJAX*. Integrated payment gateways to the systems.
- Creation of a back end systems that allows complete customisation of availability and pricing using *Zend Framework* and *jQuery*.
- Developed websites using *Joomla!*

Medea International Ltd, Dundee, Scotland

September 2006 - August 2007

- Independently developed a system in *PHP* and *AJAX* that automatises the process of RMA.
- Oversaw the programming of an Access application that is used to print, email and dispatch orders originating from different sources.
- Developed an innovative module for *Zen-Cart/osCommerce* that allows multiple online shops to be managed with only one file system and one database. With the agreement of Medea, this module "Multisite" has been released as a free contribution to the *Zen-Cart* community.

Victory ID Ltd, Edinburgh, Scotland

June 2004 - September 2004

- Contributed to the development of a multimedia kiosk prototype called Burnie, which is able to play and sell videos/music on USB devices or burn CDs with a selection of music/videos using *Visual Basic*.

SOS Developers, Sophia Antipolis, France

May 2003 - August 2003

- Oversaw the responsibility for management system software in *Visual Basic* after the unpredicted departure of the principal developer.
- Implemented the main upgrades of this software according to the needs of the employees.

LIONBRIDGE, Sophia Antipolis, France

June 2002 - August 2002

- Implemented software to evaluate projects' evolution in relation to the costs and forecasting in *Excel VBA*. Including the design of a huge database. Placement extended for two months.
